

How to make an accordion timeline (from <http://www.halfahundredacrewood.com/2012/09/an-accordion-timeline-notebook.html>)

1. Print the timeline template on cardstock paper.
2. Determine how much of the timeline you would like to see at one time. Hole-punch the first page for that interval. (To reinforce the holes, place packaging tape along the right edge before hole-punching.) Cut off the right edge margin.

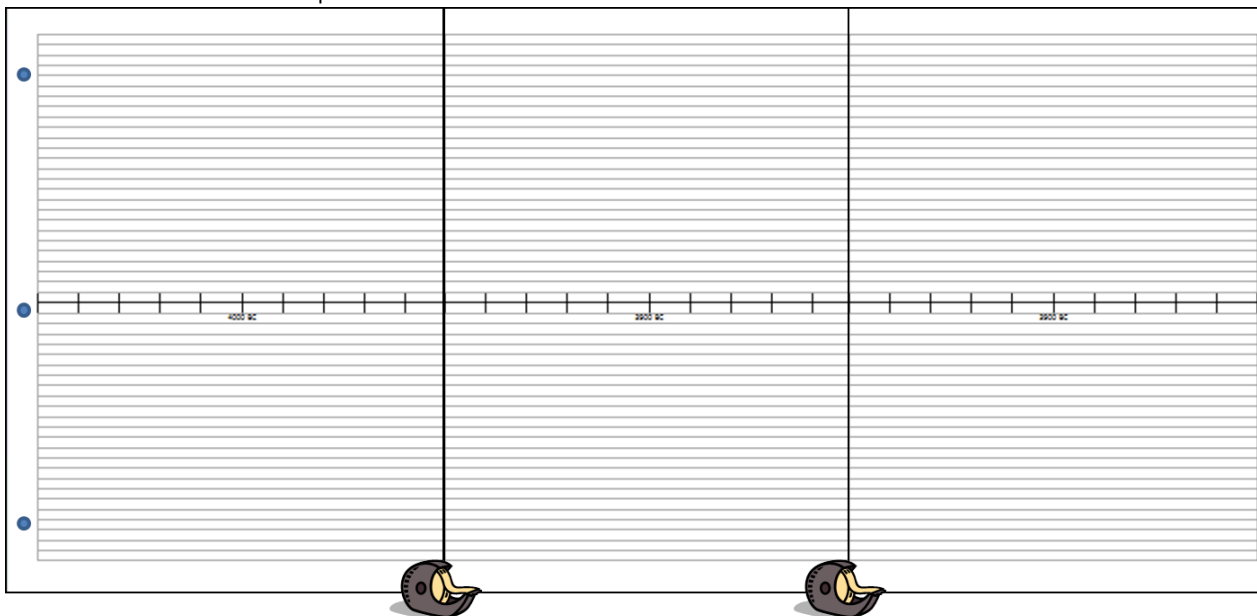

3. Cut the left and right margins off of subsequent pages for the interval you have selected.

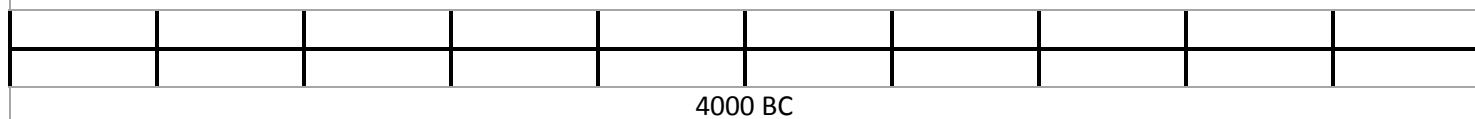

4. Align two pages at a time and tape with clear transparent tape, front and back. (You can leave a very small (<1mm) gap between pages as you tape so that it will fold more easily.) Continue to do this for the remaining pages for your selected interval of timeline.

Accordion-fold this interval and place into notebook.

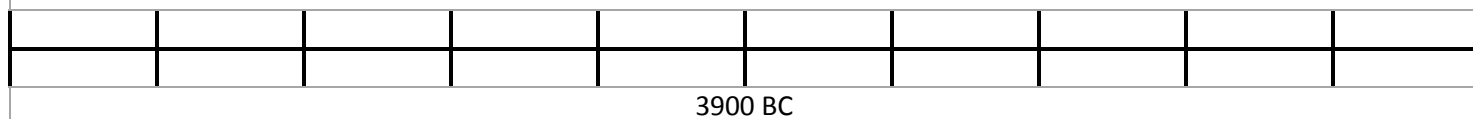

5. Repeat until you have all years of timeline completed.
